

Advanced Access

E N G I N E E R I N G

[Advanced Access Engineering](#) provides remote inspection services using unmanned aerial technology. They are approved under DNV-GL and Lloyd's Register for RIT.

Using UAVs or drones for inspections can reduce the number of people required to perform the inspection or be crowded into a small local area. Their UAV pilots are well-seasoned inspectors in the offshore industry.

ISO 9001 registered, Advanced Access Engineering is committed to quality service in Newfoundland and Labrador's offshore industry.
