

**Industrial Rubber
Newfoundland Ltd.**

Industrial Rubber Newfoundland is now producing personal protection masks* for the general public. The masks are made of Neoprene Scuba fabric which consist of 90% Polyester and 10% Spandex and have a very dense structure. They are not medically approved or certified, but we believe if everyone wore a mask they could minimize the spread of COVID-19.

Masks, showing 4 available colours

The cost per mask is \$10.00, with \$2.00 from every sale being donated to the Metro Food Sharing Association, a charity that needs all the support it can get right now.
