

safetyiQ

Powered by totaliQ

Actionable. Relevant. Timely.
A health and safety real-time database to help organization's get through the COVID-19 pandemic.

safetyiQ is a free collaboration platform for organizations and professionals to exchange actionable health and safety insights to help them keep employees safe during and after the COVID-19 pandemic.

Safety is not proprietary

We believe that each organization shouldn't have to figure out how to manage this risk in isolation. That's why we created safetyiQ, a free, light version of totaliQ's enterprise Expertise Management Platform which will allow employees, managers and occupational health & safety professionals to share best practices, templates, lessons learned, Q&A and more. The platform auto-generates an inventory of each user's areas of expertise so collaborators can identify experts in specific topics within this online community and find the relevant information they need.

Find actionable insights to help keep yourself, your company and your employees safe

Share your expertise and knowledge to help others though the crisis

Gain visibility into the health and safety community's experts and engage them to help you keep your colleagues safe

The gamification and social media experience of safetyiQ makes it fun and easy to use the platform

User	Expertise Level	Monthly Target	Areas of Expertise	Ask Question
Pierre Deschamps	32	0/100	3D Model (2130) Piping (1520) Plant Design (1495) Mechanical (870)	Ask Question
