

Innovation in Environmental Sustainability Award Criteria

Energy NL's **Innovation in Environmental Sustainability Award** recognizes an Energy NL member company which has achieved success through the development and implementation of an innovative product, technology, process, program, or policy which has or will benefit the Newfoundland and Labrador energy industry by reducing its environmental footprint and helping the industry achieve net zero by 2050.

Energy NL's Industry Achievement Awards Gala will take place September 28, 2023.

Nominations will be evaluated using the following award criteria:

Company Criteria:

The company must be an Energy NL member in good standing and be currently involved in the Newfoundland & Labrador energy industry.

Company Achievement:

The company is committed to improving the environmental sustainability of Newfoundland and Labrador's energy industry. The company's innovation has contributed to the industry's endeavors to lower emissions, reduce its environmental footprint, and achieve net zero by 2050.

Demonstrate how the company's implementation has achieved one or more of the following:

Category 1 – Environmental Footprint:

Through innovation, the member company has reduced Newfoundland and Labrador's energy industry's environmental footprint.

Category 2 – Net Zero 2050:

Will contribute to achieving Newfoundland and Labrador's energy industry's goal of achieving net zero emissions by 2050.

Category 3 – Lowers GHG Emissions:

The innovation has directly lowered Newfoundland and Labrador's energy industry's GHG emissions.

Category 4 – Other Environmental Benefits:

The innovation promotes other environmental benefits for the Newfoundland and Labrador energy industry not referenced above.

Nominations must be seconded by a letter of support.

Please see the award nomination form for more detail on the rules for nominations.
