

Stephen Penton, P. Eng.

Director, Engineering Consultancy

Steve is a graduate of Memorial University with a Bachelor of Engineering (Mechanical) degree and is a licensed professional engineer with PEGNL.

He has 20 years of experience in the energy industry gained from complex project developments in both Newfoundland & Labrador as well as internationally.

He has held leadership roles with owner project management teams as well as with EPC contractors in the areas of engineering, construction, and commissioning of energy infrastructure.

Steve is the Director of Engineering Consultancy with Aker Solutions Canada. In this position he leads a dedicated techno-economic team providing clients with low-carbon and renewable energy solutions.
